Re: ASCS No. 92-118
(Burnt Butte Survey)

Dear Mr. Bernard:

As per conversation with Mr. William Brown and yourself, please find enclosed the original mylar and blackline print of the above referenced project.

~~As~~ you are aware, after a three year delay due to various **sundry reasons**, the Matanuska-Susitna Borough is quite **anxious to final out this survey by recording the instrument.**

Toward this end, I have worked closely with Mr. Brown of your staff in an effort to circumvent the second review as requested in your correspondence of August 27, 1996.

Due to the long period of time since it was submitted as preliminary, many changes were necessary, including a field trip to restamp the "unofficial" 1935 GLO 1/4 quarter.

I would encourage you to review the document and should you encounter a problem, please give me a telephone call.

Thank you for your timely action on the above matters.

Respectfully,

Gary D. Drasky, R.L.S.
